109 Reime B, Schuecking BA, Wenzlaff P. Reproductive Outcomes in Adolescents Who Had a Previous Birth or an Induced Abortion Compared to Adolescents’ First Pregnancies. BMC Pregnancy and Childbirth 2008;8:4

!!+110 Voigt M, Olbertz D, Fusch C, Krafczyk D, Briese V, Schneider KT. The influence of previous pregnancy terminations, miscarriages, and still-birth on the incidence of babies with low birth weight and premature births as well as somatic classification of newborns. Z Geburtshilfe Neonatol 2008;212:5-12

The following is a significant APB study but is not part of the 'official' list above since it involves predominantly 'illegal' induced abortions:

* studies that included spontaneous and induced abortions (SIA) but did not report PTB/LBW risk separately for each+
+ studies that found dose/response (the more SIAs, the higher the risk)
!! Significant Abortion/VPB (Very Preterm Birth) and/or Abortion/VLBW (Very Low Birth Weight)
